

## Simultaneous Fit Results

Signal mean = 50.333

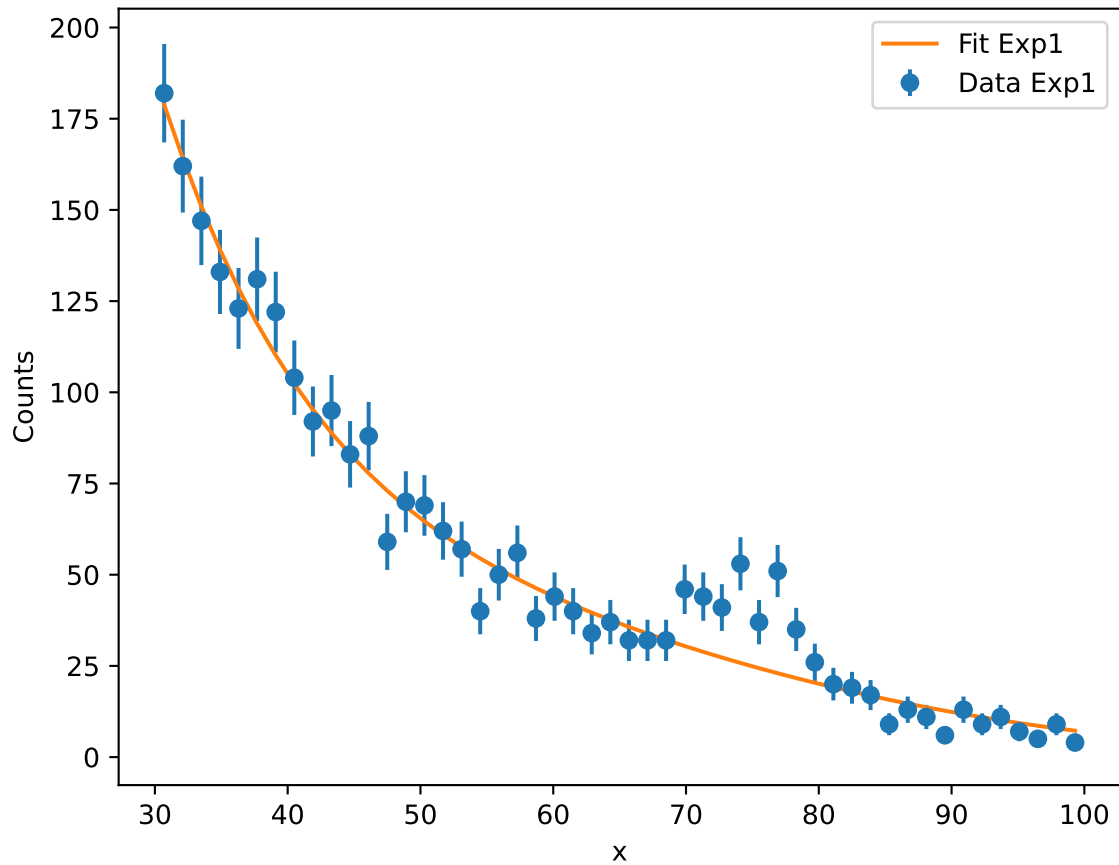

Signal sigma = 28.445

Combined  $\chi^2$  = 181.9, dof = 92, p-value = 0.000

### Comments:

I think this is not a good fit, a p value of 0 suggests this is not a likely good fit since it is much under 0.05. The chi square value is also larger than 1.
